

Amendments to the Specification:

Please replace the paragraph beginning at page 1, line 13,
as with the following amended paragraph:

US patent ~~number~~ number 6,188,933, issued
February 13, 2001, describes a stage lighting system which
operates based on computer-provided commands to form special
effects. One of those effects is control of the shape of a
light pattern that is transmitted by the device. This control
is carried out on a pixel-by-pixel basis, hence referred to in
this specification as pixilated. Control is also carried out
using an x-y controllable device. The embodiment describes
using a digital mirror device, but other x-y controllable
devices such as a grating light valve, are also contemplated.
